Professional Objective:

Highly motivated transitioning service member with an active Secret security clearance. Currently enrolled in the Washington Vets to Tech (WaV2T) program, specializing in Cloud Application Development, with an expected completion date of December 2023. This program grants 18 college credits towards a bachelor's degree in computer science. My studies include programming languages such as: Java, JavaScript, Python, HTML5, SQL, as well as the Linux operating system.

Actively seeking career opportunities in the domains of Cloud/Application Development or Software Development. Will bring a solution-focused mindset, exceptional leadership acumen, and a collaborative approach to teamwork. These skills were developed during my time in the United States Army and during my over four years as a Parts Manager and Sales and Marketing Advisor. I am eager to find a company that fosters continuous growth where I can proudly contribute and learn over the long term while ensuring customers' needs are met and exceeded while delivering the best possible customer service.
